## Walk Off More Weight

### Color Clues

When you're painting a white ceiling white, it's hard to keep track of where you left off. Spackling presents another problem—when is it dry enough to sand and paint? These and other worries are over with products that come in a visible color and—*presto*—dry to white. Ace Simply Magic Color Ceiling Paint brushes on blue but within 24 hours dries to a clean white matte finish. DAP's DryDex spackling paste starts out pink but signals it's dry by turning white after about 15 minutes. Similarly, Golden Harvest The Enhancer wallpaper paste goes on blue for accurate coverage but dries clear.
