DAP® POWER POINT® 300 High Performance Acrylic Urethane Elastomeric Sealant - Clear

**PRODUCT DESCRIPTION**

DAP® POWER POINT® 300 High Performance Acrylic Urethane Elastomeric Sealant is a versatile, premium elastomeric sealant ideal for sealing a wide range of interior and exterior applications. Stretches over 600%, seals gaps up to 3” wide and provides superior adhesion for a long lasting, crackproof seal. Unique acrylic urethane formula is easy to apply and tool, paintable, low odor, water clean-up and 100% waterproof seal. Lifetime Guarantee. Meets ASTM C920, Class 25. VOC compliant. Interior/exterior.

**KEY FEATURES & BENEFITS**

- Stretches over 600% - Crackproof
- Seals gaps up to 3” wide
- Strong multi-material adhesion
- Paintable
- 100% waterproof & weatherproof seal
- Easy water clean-up, low odor, VOC compliant
- Cured sealant is mold & mildew resistant
- Lifetime Guarantee
- Meets ASTM C920 Specification, Class 25
- Interior/exterior use
USE FOR CAULKING & SEALING:

- Windows
- Doors
- Crown Molding
- Chair Rails
- Molding
- Interior Trim
- Corner Joints
- Countertops
- Sinks
- Pipes
- Vents
- Ducts
- Siding
- Exterior Trim
- Soffits

ADHERES TO:

- Wood – painted & unpainted
- Aluminum
- Most metals
- Vinyl
- Most plastics
- Glass
- Drywall
- Plaster
- Brick
- Stone
- Concrete
- Mortar
- Stucco
- Fiber Cement
- EIFS
- PVC Molding & Trim Board
- Composite Wood
- Most common building materials

FOR BEST RESULTS

- Apply in temperature above 40°F.
- Do not apply when rain or freezing temperatures are forecasted within 24 hours. Cooler temperatures and higher humidity will slow down dry time.
- **Sealant applies white and dries clear in 7-14 days.**
- Not for continuous underwater use, filling butt joints, surface defects or tuck-pointing.
- Joint size should not exceed 3” wide x 1/2” deep. If joint depth exceeds 1/2”, use backer rod material.
- Store sealant away from extreme heat or cold.

APPLICATION

**Surface Preparation**
Surface must be clean, dry, structurally sound and free of all old caulk, dirt and other foreign material.
**Product Application**

1. Apply in temperatures above 40ºF. Do not apply when rain or freezing temperatures are forecasted within 24 hours. Cooler temperatures and higher humidity will slow down dry time.
2. Cut nozzle at 45º angle to desired bead size.
3. Load cartridge into caulk gun.
4. Fill gap or joint with sealant.
5. If necessary, tool or smooth the bead of sealant with a finishing tool before the sealant skins over.
6. Clean up excess wet sealant with a damp sponge before it skins over. Excess dried sealant must be cut or scraped away.
7. Allow sealant to dry clear (approximately 7-14 days) before painting with latex or oil-based paints. Cooler temperatures and higher humidity may require longer drying time.
8. Reseal cartridge for storage and reuse.

**CLEAN UP & STORAGE**

Clean up excess wet caulk with a damp sponge before it skins over. Excess dried caulk must be cut or scraped away. Clean hands and tools with warm water and soap. Store container in a cool, dry place away from extreme heat or cold.

**SAFETY**

See product label or Safety Data Sheet (SDS) for health and safety information. You can request a SDS sheet by visiting our website at dap.com or calling 888-DAP-TIPS.

**WARRANTY**

**LIFETIME GUARANTEE:** DAP warrants this product for sealant purposes during the lifetime of your home, when used as directed, within one year of purchase. Call (888) DAP-TIPS, with your sales receipt and product container available for replacement product or sales price refund. DAP is not liable for incidental or consequential damages.
