DAP® CAULK-BE-GONE® Latex Caulk Remover

PRODUCT DESCRIPTION

DAP® CAULK-BE-GONE® Latex Caulk Remover is specially formulated to soften most types of latex caulks and sealants for quick and easy removal. The fast-acting formula works in as little as two hours. CAULK-BE-GONE® is an easy-to-use green gel that stays where applied and has a fresh scent.

KEY FEATURES & BENEFITS

- Softens caulk for easy removal
- Removes most types of latex caulks and sealants
- Fast-acting, gel formula
- Fresh scent
- Easy water clean-up

FOR BEST RESULTS

- Product does not work on silicone, polyurethane or other non-latex based caulks/sealants.
- To avoid substrate damage, check for compatibility prior to use by testing a small, inconspicuous area.
- Do not use on refinished porcelain, soft plastics, vinyl, ABS plastic tubs/shower enclosures. Some fiberglass, other plastics or refinished surfaces may be affected.
- If possible, use painter’s masking tape to mask the area adjacent to the old caulk being removed.

2/25/2019
- If caulk remover makes contact with wallpaper or painted/coated surfaces, wipe off immediately as it will soften them.
- Thicker caulk beads and painted caulk may take longer to soften or require multiple applications.
- Product cleans up with soap and water.

**APPLICATION**

**Product Application**
1. Remove cap and cut nozzle at 45º angle to desired bead size.
2. Apply the same size bead of CAULK-BE-GONE® Remover over bead of old caulk/sealant, being careful not to extend beyond the area of caulk/sealant being removed.
3. Allow CAULK-BE-GONE® Remover to set until old caulk becomes soft (at least 2 hours but no longer than 6 hours per application). Repeated applications may be needed for thicker beads of caulk.
4. Remove softened caulk with a plastic scraper or caulk removal tool.
5. Remove any remaining sealant film with a plastic scraper or soft plastic abrasive pad.
6. Thoroughly clean up area with soap and water. Use rubbing alcohol to remove any residue prior to applying new caulk/sealant. Area should be dry before applying new caulk/sealant.
7. Follow caulk/sealant manufacturer's instructions for applying sealant.
