DAP® SILICONE PLUS™ Premium Window, Door & Siding 100% Silicone Sealant

PRODUCT DESCRIPTION

DAP® SILICONE PLUS™ PREMIUM WINDOW, DOOR & SIDING 100% SILICONE RUBBER SEALANT is a one-component, neutral cure silicone that cures to a tough, rubbery solid. It is shrink and crack proof and provides outstanding durability and flexibility for a long-lasting, 100% waterproof and weatherproof seal. It is rain ready in just 30 minutes without washing out. Cured sealant is mold and mildew resistant. Low in odor. Ideal for a wide variety of interior and exterior applications such as sealing around windows, doors, siding, trim, pipes, vents and ducts. Lifetime Guarantee. Interior/exterior use. Meets ASTM C920, Class 25. Interior/exterior use.

KEY FEATURES & BENEFITS

- Meets ASTM C920, Class 25
- Outstanding flexibility & adhesion
- 30 minute rain ready
- 100% waterproof & weatherproof
- Shrink & crack proof
- Cured sealant is mold & mildew resistant
- Low odor
- Interior/exterior
- Lifetime Guarantee
## Suggested Uses

**Use for Caulking and Sealing:**
- Windows
- Doors
- Siding
- Trim
- Gutters
- Flashing
- Vents
- Pipes
- Corner joints
- Above ground foundations

**Adheres To:**
- Wood – painted & unpainted
- Glass
- Ceramic
- Porcelain
- Vinyl
- Most plastics (PVC, ABS)
- Aluminum
- Most metals
- Drywall
- Plaster
- Composite materials
- Fiber cement board
- Fiberglass
- Most common building materials

## For Best Results
- Application temperature range is between -35°F and 120°F.
- Joint width should not exceed ½”. If joint depth exceeds ½”, use foam backer rod.
- Allow 24 hours for sealant to fully cure. Sealant will not cure in totally confined spaces.
- Not recommended for filling butt joints, surface defects, tuck pointing, structural glazing, continuous underwater use, high temperature surfaces, or surface defects.
- Not recommended on surfaces that might bleed oils, plasticizers or solvents. Best adhesion and compatibility are not achieved with substrates made of methylmethacrylate, polycarbonate, polypropylene, polyethylene or polytetrafluoroethylene. Evaluate such substrates before using sealant.
- **Not paintable.** Paint substrate surface before applying sealant.
- Store below 80°F in dry place for optimal shelf life.

## Application

**Surface Preparation**
Surface must be clean, dry, structurally sound and free of old caulk, dirt, dust & other foreign material.

**Product Application**
1. Cut nozzle at a 45° angle to desired bead size.
2. Puncture inner foil seal.
3. Load cartridge into caulk gun.
4. Fill gap or crack with sealant.
5. If necessary, tool or smooth the bead of sealant with a finishing tool before the sealant skins over.
6. At 73°F & 50% relative humidity, sealant is water resistant at 30 minutes & reaches full cure in 24 hours. Low humidity may slow cure.
7. Clean up excess uncured sealant from surface and tools with mineral spirits. Scrape or cut away excess cured sealant. Do not use mineral spirits to clean hands or skin. Wash hands or skin with soap and water.
8. Sealant is not paintable. Paint surfaces prior to applying sealant.
9. Reseal cartridge for storage and reuse.

CLEAN UP & STORAGE

Remove excess uncured sealant from surfaces and tools with mineral spirits. Excess cured sealant must be cut or scraped away. Do not use mineral spirits to clean hands or skin. Wash hands or skin with soap and water. Store container in temperatures below 80ºF and in a dry place.

SAFETY

See product label or Safety Data Sheet (SDS) for health and safety information. You can request a SDS by visiting our website at dap.com or calling 888-DAP-TIPS.

WARRANTY

LIFETIME GUARANTEE: DAP warrants this product for sealant purposes during the lifetime of your home, when used as directed, within one year of purchase. Call (888) DAP TIPS, with your sales receipt and product container available for replacement product or sales price refund. DAP is not liable for incidental or consequential damages.
