DAP® DYNAGRIP® Advanced Subfloor Construction Adhesive

**PRODUCT DESCRIPTION**

DAP® DYNAGRIP® ADVANCED SUBFLOOR is a premium grade construction adhesive specifically formulated for subfloor & deck installation. This VOC compliant solvent based adhesive prevents floor squeaks and improves the structural performance of floor assembly when used properly. DYNAGRIP® ADVANCED SUBFLOOR adhesive delivers a high strength weatherproof bond on wet, frozen and treated lumber, and is easy to gun in cold temperature.

**KEY FEATURES & BENEFITS**

- Easy to Gun in Cold Temperatures
- Bonds Wet, Frozen & Treated Lumber
- High Strength Weatherproof Bond

**PERFORMANCE CHARACTERISTICS**

- Won’t freeze
- Provides a strong permanent bond
- Prevents floor squeaks
- Improves structural performance of floor assemblies
- Meets ASTM D3498 & APA AFG-01 specifications for subfloor installation
- PFS certified

**SUGGESTED USES**

**Adheres to:**
- Concrete
- Dimensional Lumber
- Masonry
- Metal
  
- Moisture Resistant OSB
- OSB
- Plywood
- Treated Lumber
- Wood

**Recommended for:**
- Subfloor & Deck Installation
- Wood-to-Wood Assemblies
- Glued Floor Systems

**Not Recommended for:**
- Bonding two non-porous materials
- Constant water exposure
- Foamboard installation
- Mirror installation
- Applications other than subfloor & deck installation

**FOR BEST RESULTS**

- Apply in temperatures above 0°F. Keep adhesive above 40°F for easier gunning.
- One surface must be porous.
- Store away from extreme heat or cold.

**NOTE:** If using on concrete, concrete must be above grade, dry & fully cured (at least 28 days.)

**APPLICATION**

1. Surfaces must be clean, structurally sound and free of debris.
2. Precut and fit materials before applying adhesive.
3. Trim nozzle to desired bead size. 3/8" bead is recommended for subfloor applications.
4. Puncture inner foil seal.
5. Load cartridge into applicator gun.
6. Apply a continuous bead to joists, studs or backside of siding or panels. (See specific Application Tips below).
7. Within 15 minutes, position and press substrates firmly into place. If left open longer than 15 minutes, scrape off and reapply.
8. Install nails or screws within 15 minutes after positioning substrates in place.
9. Allow to dry for 24 hours before exposing to heavy traffic.

**APPLICATION TIPS: TONGUE & GROOVE SUBFLOOR:** Use a 3/8” continuous bead on joists. Use ample bead of adhesive in all grooved channels (remove excess squeezed out adhesive before it dries). Panel joints should not be tight. Allow 1/8” gap for expansion. Position and nail or screw within 30 minutes. Proper installation methods for subfloorings must be followed. **DECKS:** Use 1/4” adhesive bead on every joist for additional strength and to prevent squeaks. Nail planks at every other joist. Predrill nail holes.

Clean up & Storage

Uncured adhesive: use mineral spirits to clean up wet adhesive from surface and tools, following solvent manufacturers precautions. Do not use mineral spirits to clean skin. Cured adhesive must be cut or scraped away.

Safety

See product label and Safety Data Sheet (SDS) for health and safety information. You can request an SDS by visiting our website at dap.com or by calling 1-888-DAP-TIPS.

Warranty

DAP will provide replacement product or refund sales price if product fails to perform when used as directed. Call 1-888-DAP-TIPS, with your sales receipt and product container available, to arrange for warranty fulfillment. DAP is not liable for incidental or consequential damages.

Company Identification

Manufacturer: DAP Products Inc., 2400 Boston Street, Baltimore, Maryland 21224
